Maintech International Becomes an Authorized Distributor and Repair Facility for Flowserve Pumps

Maintech International has been providing rotating equipment repair services since 1981

APR 6, 2009 — Maintech International L.L.C. has reached a contractual agreement to become an authorized distributor, repair and maintenance facility in South Texas, U.S.A., market for Flowserve Pumps. This association strengthens the sales and marketing network for Flowserve in South Texas, as well as recognizes Maintech's long-established reputation for quality customer service in the fluid motion and control products industry, the company said..

Maintech is authorized to provide units, parts, repair and service for most Flowserve pumping requirements. The Flowserve product brings many heritage names of distinction including ACEC, Aldrich, Byron Jackson, Cameron, Durco, IDP, Jeumont-Schneider, Pacific, Pleuger, Scienco, Sier-Bath Rotary, Simpson, United, Western Land Roller, Wilson-Snyder, and Worthington. Flowserve produces products for many industrial market segments; including oil & gas, hydrocarbon processing, chemical, power, mining and water resources.

Pump types include end suction centrifugal pumps, ANSI pumps, API-610 pumps, single stage centrifugal, multi stage centrifugals, horizontally split case, multi-stage diffuser pumps, multi stage ring sectional pumps, barrel pumps, vertical in-line pumps, vertical multi-stage pumps, slurry pumps, hard metal slurry pumps, rubber lined slurry pumps, vertical and horizontal process pumps.

Maintech International has been providing rotating equipment repair services since 1981. The current ownership and management assumed control in 1996. Since that time, the physical plant and facilities have doubled to approximately 25,000 square feet under roof and four acres of available surface area.
